A FEW THINGS TO NOTE

TAKING YOUR PHOTO

To make the process even faster, you can now take your own passport photo and upload it with your application. We've created a video with tips on how to take your photo correctly.

Watch the video at:

Once you have your photo and have found a referee, applying online should take less than 15 minutes.

LOGIN

You will need a RealMe login to apply for your passport online – this keeps your details safe and secure and lets you save your application, so you can come back any time within seven days to complete the form.

RealMe also lets you log in to lots of NZ sites and services. If you don't already have a RealMe login, you'll be asked to create one during the application process.
